THE INTERNATIONAL BESTSELLER.

The Model 314 Dvorak is the most popular Scotchman Hydraulic Ironworker with over 6000 machines in use around the world. And for good reasons: proven reliability, safe and easy operation, low maintenance, and the power and versatility to handle all kinds of jobs. For example, the standard 3 inch angle shear is quickly interchangeable with the mini-shear or notcher/coper attachments allowing multiple step fabrication to be completed with a minimum of down time. In lighter materials, the 314 Dvorak can operate at up to 55 strokes per minute for maximum productivity. Versatile features such as these have made Scotchman Hydraulic Ironworkers international bestsellers for fabrication, production and vocational training. And the 314 Dvorak is inexpensive to own and operate. In dollars, francs, pesos or yen, you can be certain of getting your money's worth.
